

A Dangerous Mobile Phone

When you see the pictures below, you will understand why they want our cell phones through the x-ray machine.

If you get asked to test your cell phone at the airport, this is the reason!

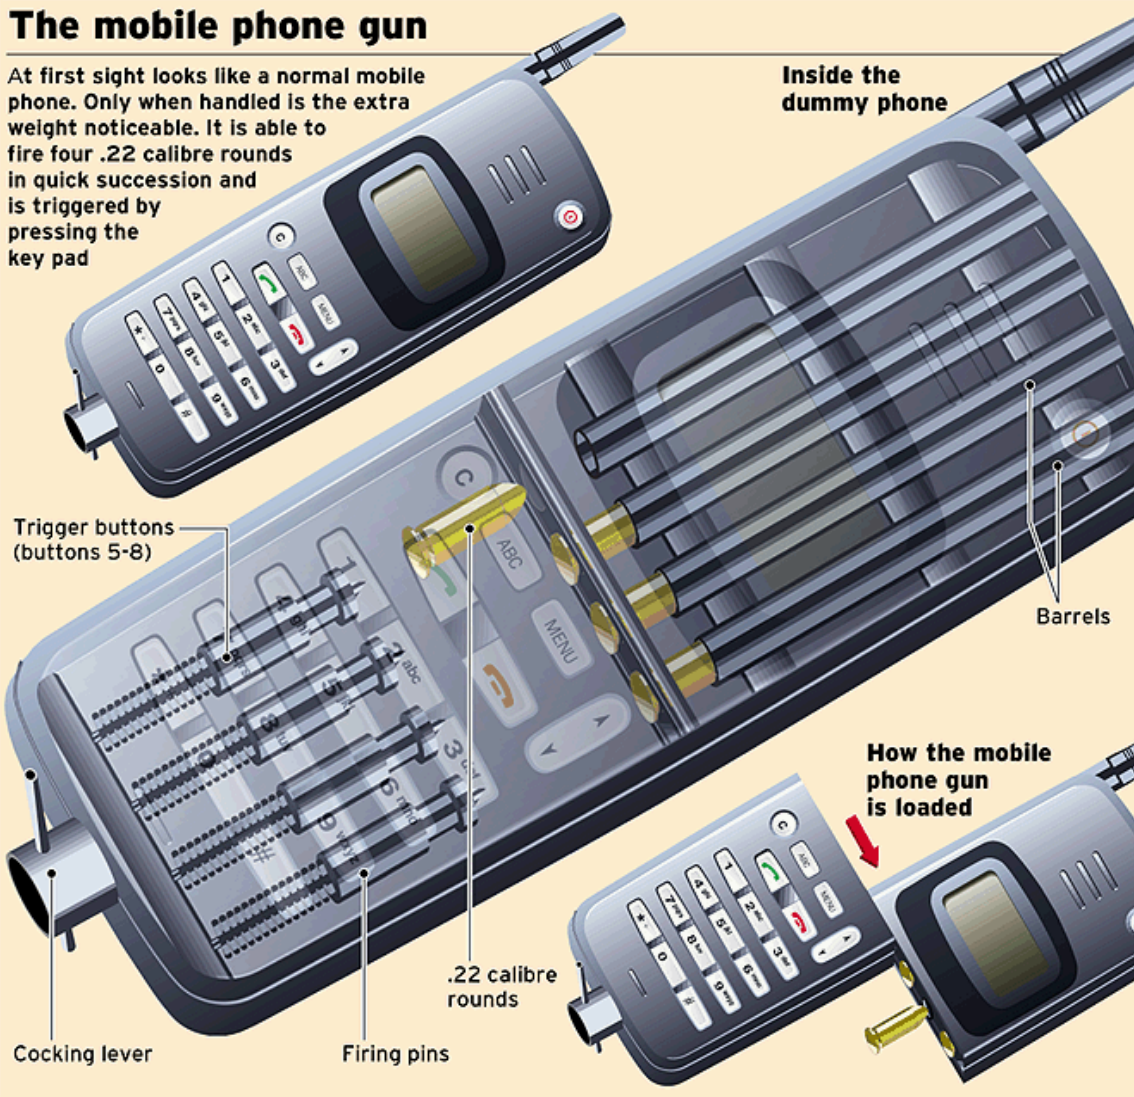

Cell phone GUNS have arrived. And they are real. Beneath the digital phone face is a .22 caliber handgun capable of firing four rounds in rapid succession using the standard telephone keypad. European law enforcement officials are stunned by the discovery of these deadly decoys. Only when you have one in your hand do you realize that they are heavier than a regular cell phone.

The mobile phone gun

At first sight looks like a normal mobile phone. Only when handled is the extra weight noticeable. It is able to fire four .22 calibre rounds in quick succession and is triggered by pressing the key pad

Inside the dummy phone

If security asks to look at your cell phone OR turn it on to show that it works. They have a good reason! Wake up to our NEW WORLD!
